

LEAN PRINCIPLES IN PRACTICE

Lean fundamentals for the modern manufacturer

Half-day Session

Production Area Focus

Teams & Groups Welcome

This session equips your team with core skills in a fun and collaborative way to help them learn to see and eliminate waste on the production floor.

Benefits

Participants will learn to identify value-added vs. non-value-added activity, spot waste in processes, and drive employee-led problem-solving. An ideal entry point to Lean — or a reset for your continuous improvement journey.

What to Expect

A hands-on half-day session designed for supervisors, frontline leaders, and production teams with any level of Lean experience. Participants work through practical exercises that build a shared vocabulary and team confidence.
